PRODUCT CATALOGUE

Company Overview

We help people rethink the way we consume power today for a more sustainable future for the generations to come.

Founded in 1964, GP is one of the world's major suppliers of primary and rechargeable batteries with over 5,000 people dedicated to developing, manufacturing and marketing batteries, portable power and lighting solutions to empower people's everyday life. GP strives to develop innovative products that are both eco-friendly and cost-efficient in order to enrich the daily experience and improve the living standard of its customers as a whole. Today, we are our customers' trusted brand to power their homes, devices and family.

We are not just in the business of portable power, we are also in the business of empowerment. We power the devices and moments in people's lives that make them feel more powerful every single day, in ways big and small. These are not always the epic life-changing moments, but also the quieter everyday moments – around the house, in the office, outdoors – when we power on the devices that make our lives easier, happier and safer.

We believe that power comes in all shapes and sizes, it can be as small as a coin cell battery and as large as a vision to change the way people consume power.

Sustainability

GP Batteries has always held a high standard for environmental, social and governance matters. As people's lives progress and place greater demands on our planet, at GP we feel the responsibility to develop more sustainable sources of power. We play our part in building a greener tomorrow, to do it in a responsible manner, and to do it for the long run.

Waste Reduction

Reducing waste is one of GP's main environmental focus areas. We have been working towards zero waste in our battery manufacturing facilities - to measure and validate reduction, reuse, recovery, composting, anaerobic digestion and incineration of waste to energy generated from our production.

As the first plant in Malaysia to earn the Gold ZWTL Validation, GP Batteries' Tebrau plant has met the requirement of waste diversion levels of 95–99% by implementing best practices and process improvements that have helped increase waste diversion.

We are constantly looking for ways to increase the use of recycled materials in our battery products. We are the first battery company in Greater China that has obtained voluntary UL Environmental Claim Validation (ECV) certificate for our recycled content (UL ECVP 2809) and many of our rechargeable battery models contain at least 10% recycled material.

Beyond the products themselves, GP is actively exploring ways to increase the use of recycled materials in our packaging. For instance, our new range of Recyko rechargeable batteries and chargers features plastic-free certified paper packaging.

Why should you list GP products?

Founded in 1964

Battery experts for over 60 years

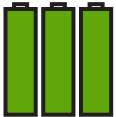

Environmental Leadership

Part of UL Environmental Claim Validation Program

World Leaders

World Leaders in Rechargeable batteries (NiMH)

Battery Production

Annual production of over 6 Billion batteries.

User-Centric Innovation

In both products and packaging design.

Available Worldwide

Sold in over 1 million retail outlets worldwide.

GP Recyko

Charge faster and easier

The very nature of rechargeables is to limit the consumption of new batteries and to reduce the use of raw materials, pollution, and waste to landfills. To make a planet-friendly choice, look for the green circle All Recyko products feature plastic-free, recycled paper packaging.

All Recyko batteries are made in our manufacturing facilities that have achieved Zero Waste to Landfill (ZWTL) Validation from UL.

90%+ of the entire battery pack (including the box) for all Recyko battery products can be recycled. Selected cell models of Recyko batteries are certified as made of more than 10% recycled materials.

Recyko Chargers

GP RECYCKO - B423 Charger Highlights

Fast charging in 6 hours* (4pcs AA 2100mAh)
Recharge AA/AAA rechargeable batteries powered USB-C cable (30cm USB-C to USB-C cable included)

PD charging compatible
Powered input by USB-C

Flexi-Charging with LED indicators (8-LED)
Charge any AA/AAA pieces, 1-8pcs NiMH batteries at a time Display for charging status, single-use and bad battery

Battery level check

Auto battery test and charging optimization with status indicators

LED indicators (4-LED)

LED indicates the power status, which enables users to sort out the drained batteries and recharge

Auto cut-off

Display for charging status, single-use and bad battery

GP RECYCKO - E922 Charger Highlights

Fast charging in 6 hours* (4pcs AA 2100mAh)
Recharge AA/AAA rechargeable batteries powered USB-C cable (30cm USB-A to USB-C cable included)

PD charging compatible
Powered input by USB-C

Flexi-Charging with LED indicators (4-LED)
Charge any AA/AAA pieces, 1-4pcs NiMH batteries at a time Display for charging status, single-use and bad battery

Battery level check

LED indicates the power status, which enables users to sort out the drained batteries and recharge

LED indicators (4-LED)

LED indicates the power status, which enables users to sort out the drained batteries and recharge

Auto cut-off

Power cuts off or switches to trickle charge mode when batteries are fully charged, preventing overcharging and overheating for enhanced safety and battery life

GP RECYCKO - M423 Charger Highlights

Fast charging in 2 hours* (4pcs AA 2100mAh)
Recharge AA/AAA rechargeable batteries powered USB-C cable (30cm USB-C to USB-C cable included)

PD charging compatible
Powered input by USB-C

Flexi-Charging with LED indicators (4-LED)
Charge any AA/AAA pieces, 1-4pcs NiMH batteries at a time Display for charging status, single-use and bad battery

Battery level check

LED indicates the power status, which enables users to sort out the drained batteries and recharge

LED indicators (4-LED)

Display for charging status, single-use and bad battery

Technical Facts

Recyko Batteries

Range		Recyko				
Capacity (mAh)		2000	2100	1300	1300	650
Size		AA			AAA	
Electrochemical System		Nickel-metal Hydride (NiMH)				
Cycle Life	(IEC61951-2(2017) 7.5.1.4)	100	200	200	200	300
	(IEC61951-2(2017) 7.5.1.2)	300	500	500	500	1000
Diameter (mm)		14.5			10.5	
Height (mm)		50.5			44.5	
Weight (g)		31	27	23	15.2	12.5
Voltage (V)		1.2				
Operating Temperature (°C)		-20oC to 50oC				

•Insert 1-4 batteries in slot ½/3/4, it will start BLC mode with green LED indication on corresponding channel as mentioned above and keep for 5s. Then will go to normal charging. To recheck BLC, just take out and insert battery again.

Technical Facts

Recyko Batteries

Range		Recyko		
Capacity (mAh)		3000	3000	200
Size		C	D	9V
Electrochemical System		Nickel-metal Hydride (NiMH)		
Cycle Life	(IEC61951-2(2017) 7.5.1.4)	300	300	200
	(IEC61951-2(2017) 7.5.1.2)	1000	1000	500
Diameter (mm)		26.2	34.2	15.7 X 26.5
Height (mm)		50	61.5	48.5
Weight (g)		60	70	42.5
Voltage (V)		1.2		
Operating Temperature (°C)		-20oC to 50oC		

*700 battery charging cycles based on internal test by GP according to IEC 61951-2, which corresponds to charging in Eco mode for the Charge 10 Ultra-Fast Charger. Cycle life varies according to conditions of use. If exclusively charged in Ultra-Fast mode at 10A, up to 250 cycles can be achieved.

Technical Facts

Recyko Chargers & Docks

Product Specification	USB 4-Slot Charger B423	USB 8-Slot Charger E822
Input:	DC5V 1A	DC5V 2A
Charging Channels:	4 independent channels ; 1 slot/channel for 1- 4 pcs AA/AAA NiMH batteries	8 independent channels 8 slot/channel for 1-8 pcs AA/AAA NiMH batteries
Output Voltage:	1.4V	1.4V
Charging Current	400mA Approx.. for AA/AAA Ni-MH batteries	400mA approx. for charging 1-8 channel AA/AAA Ni-MH batteries
Approximate Charging Time*	Approx. 360 Min for 2100mAh Approx. 180 Min for 850mAh	360 Min for charging AA 2100mAh Ni-MH Batteries 180 Min for charging AAA 850mAh Ni-MH Batteries
Trickle Charging Current	400mA Approx.. for AA/AAA Ni-MH batteries	40mA approx.
Standby current at no input	<0.1mA	<0.1mA
Operation Temperature	0°C to 30°C	0°C to 30°C
LED Indication :	Green LED (4 pcs) ON for 0.5 second after just USB power input	Four Green LEDs ON for 0.5 second after just USB power input
	Charging in progress – Green LED slow flashing	
	Fully charged – Green LED ON	
	Bad/Primary Batteries inserted – Green LED fast flash	
	Battery Level Check (BLC)* – Green LED ON for Battery Full	
	Green LED Slow Flash for Battery NOT Full	
Safety Protection	Timer protection – 8 hours +/- 10%	Timer protection – 8 hours
	-dV	
	Primary Battery Protection	
	Reverse polarity protection	
Dimensions	80.7 (L) x 69.5 (W) x 22.8 (H) mm	131.5 (L) x 80.5 (W) x 23 (H) mm
Weight	44 g (approx.)	85 g (approx.)
Certification	CE, UKCA & Rohs	
Warranty Period	12 months from ex-factory date

Alkaline Batteries

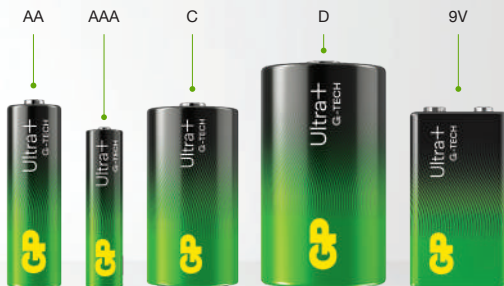

= Extra
playtime

Supported by G-TECH

Alkaline Batteries New & Improved

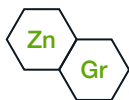

Alkaline G-TECH comes in all shapes and sizes, for all your needs.

The right details. The right chemistry.

What is G-TECH?

G-TECH powers that extra flash, pop, zing or zoom you're looking for. Here's how it works.

High-Density Zinc S powder

The power core uses High-Density Zinc S powder to provide rapid, robust power generation and improved performance.

Streamlined Inner Design

Tough corrosion-proof steel with Streamlined Inner Design increases surface area of reactive materials for higher power transmission.

Multi-ring core with High-Purity Graphite

High-Purity Graphite enhances electrical conductivity and for longer lasting power.

Patented Leak Prevention

A patented nylon sealing ring and durable corrosion-proof design ensure long-term battery storage while preventing battery leakage.

Alkaline Batteries

Unique Packaging

Strong Communication

Packaging can be like theater,
it can create a story. — Steve Jobs

Alkaline Batteries

Powerful Solution For All Devices

Ultra+

The ultimate power in your hands

200%* extra power and runtime for uninterrupted energy.

* up to 200% more power in high drain application vs IEC 60086-2 : 2021 MAD

Ultra

Get more out of every moment

80%* long-lasting output to make every moment brighter.

* up to 80% more power in high drain application vs IEC 60086-2 : 2021 MAD

Super

Steady and ready for everyday needs

50%* extra zap to keep you energised when you need it.

* up to 50% more power in portable lighting (LED) application vs IEC 60086-2 : 2021 MAD

Smart Bulk Packaging for Heavy Users

Power and Sustainability, Packed for Efficiency

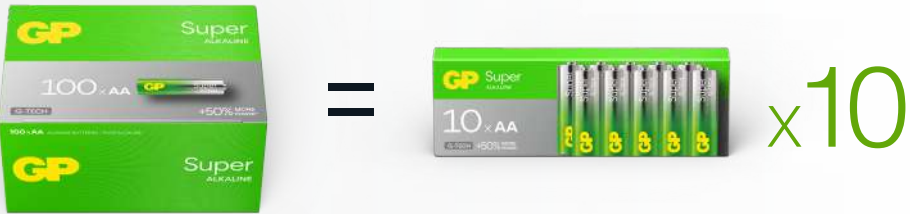

GP's new **Ultra+** and **Super** battery ranges deliver unmatched performance with flexible, efficient packaging designed for all sectors, including B2B and MRO.

- **Ultra+ Performance:** AA 200% power, AAA 150% power.
- **Super Value:** 50% more power in AA and AAA, optimized for low-drain applications.

Smart Bulk Packaging

Our innovative solution allows you to sell as a **single 100-box unit** or **10x10 packs**—one SKU, two solutions. Efficient, versatile, and ready for any application.

Elevate your offering with GP batteries—sustainable, high-performance, and built for the modern business.

Can be sold in 100's or individually in 10pks too, giving ultimate flexibility!

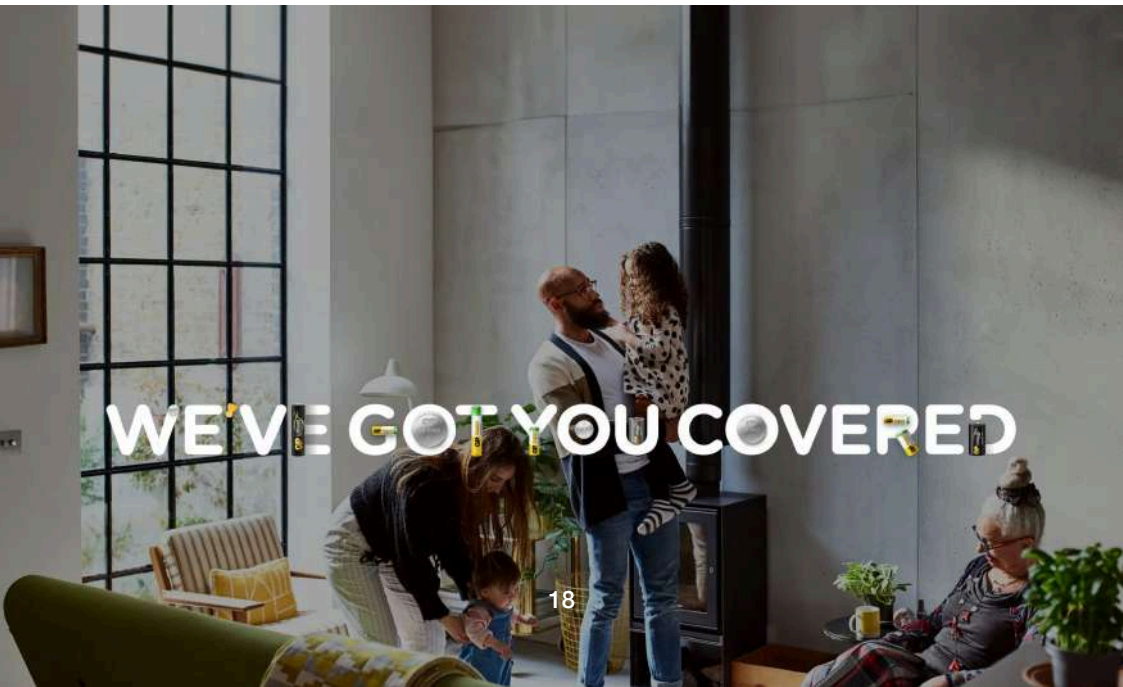

Specialty Batteries

Introduction

Hard-to-Find GP Specialty Batteries

As the world continues to develop breakthrough technologies, GP Batteries never stops innovating original ideas for power solutions. We notice the constant changes in our daily surroundings and make great efforts to keep up and provide the very best to our customers and community. Numerous electronic devices we use today require unique batteries that are uncommon. GP Batteries offers a wide selection of these specialty batteries for items such as security and medical appliances, professional cameras, watches and more!

Developed with our customers' needs in mind, our high performance GP specialty batteries make it possible for us to become your most reliable and trustworthy battery expert today. All our products are designed to be long-lasting, economical, and dependable; an ideal choice for customers who value high quality products with an affordable price. We also ensure that all our products are safe to use for customers.

Specialty Batteries

Product Categories

Coin & Button Cell Batteries

Compact sizes. No compromise. Harness long-lasting power with GP's high-performance coin and button cell batteries. The comprehensive battery range offers something for everyone and every device - you can always find the right battery for a wide variety of applications. Ideal for small but energy-demanding smart gadgets, home automation devices like car keys, motion sensors, critical health appliances, and more.

Cylindrical Batteries

With the premium range of GP cylindrical batteries that guarantee ultra-long operating times and enhanced performance, you will never have to disconnect again. Compatible with most everyday devices, like wireless IP cameras, photo-flash, garage door opener remote control and more.

Others

Finding the right battery for your appliance should never be a struggle. GP offers an extensive range of innovative specialty batteries that fit all sorts of electrical appliances from digital cameras to construction barricade lights. We've got you covered.

Specialty Batteries

Quality and Safety

Since specialty batteries are about a unique combination of maximized performance in a very small casing, quality and safety are a very high priority for this product group. As one of the world's leading battery brands, GP is committed to providing products that live up to the highest international standards. We adhere to strict safety requirements and our quality assurance centres and laboratories have been well recognized by international bodies.

Our specialty batteries are designed to ensure complete safety and maximize performance for your devices.

Unique battery structure:

- Traps electrolyte for better chemical reaction
- Improves stability for longer lasting power

Customized sealing technology:

- Ensures low self-discharge for a longer shelf life
- Prevents leakage for product safety

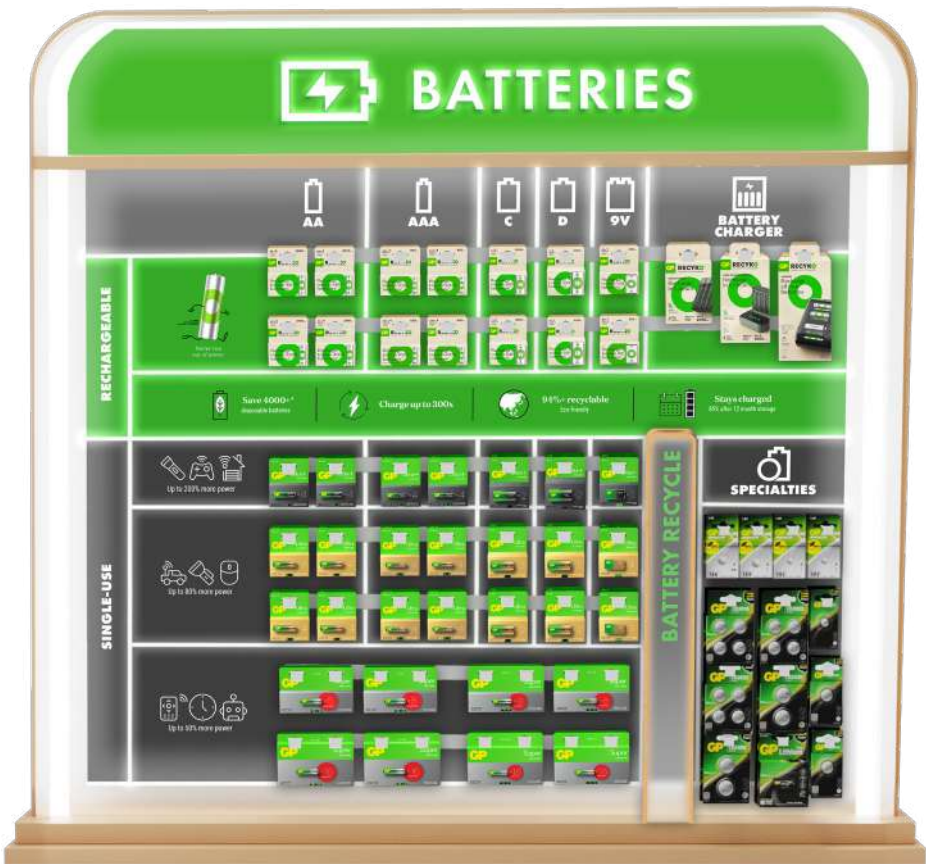

Our emphasis on safety doesn't end at the product itself - for example, we also introduced childproof packaging for our lithium battery coins to prevent children from accidental battery ingestion.

Alkaline Batteries

Impact On Shelf

A packaging experience that offers an immediate and impactful point of difference helps a shopper's decision making process, giving them a simpler choice to make.

Power Banks

B+ Series Powerbank

Stay Powered Up Anywhere

The GP B+ series Powerbank offers essentially everything you need to stay powered up where ever you go at affordable price levels.

Nevertheless it's packed in a unique design and is equipped 8 levels of safety protection as you may expect from the battery experts.

20W

PD Wired Output

Qi2 Certified Charging

Next-generation wireless charging with magnetic alignment for effortless placement. Backwards compatible with MagSafe-compatible iPhone, Qi-enabled Android phones, and all Qi-certified devices. Charging speeds and features vary by device.

Designed to Fit

Optimised magnetic alignment ensures a seamless, secure connection. Cameras stay fully unblocked for uninterrupted use. The built-in foldable stand delivers hand-free convenience wherever you go.

2-in-1 Power Band & Charger

Use wirelessly or plug in for passthru charging - power flows directly to your device, bypassing their internal battery to reduce heat and enable faster charging. Dual-device support via wireless pad and USB-C port simultaneously.

Certified for Safety

CE, UKCA, and CCC certified, meeting rigorous international safety and quality standards. UN38.3 compliant for safe air transport. Travel with complete confidence - commuting or flying overseas.

Magnetic Safe Cube

Small but Mighty 5000mAh

The Cutest & Most Compact Power Buddy

The GP 5,000mAh Magnetic Safe Cube gives you everything you need to stay powered up wherever you go — without the bulk. Pocket-sized, featherlight at ~120g, and 50% smaller than a smartphone, it's built for people who are always on the move.

It snaps onto your iPhone magnetically for instant wireless charging, and works with any Qi-enabled Android too. Charge two devices at once — wirelessly and via USB-C — and get a full iPhone 17 charge from a single cube.

Small but Mighty

- 50% smaller than a smartphone (75 × 64 × 16mm)
- Featherlight ~120g — fits anywhere
- Strong battery — charges fast, lasts long

Why Gen Z Loves It

- Trendy & Instagrammable — looks as good as it performs
- MagSafe Compatible — snap on and charge, no cables needed
- Qi Wireless — works with Android too
- No bulk, no hassle — throw it in your bag and go

Smart Advanced Protection

- Equipped with 7 layers of safety protection and over 100 GP safety tests, so you can charge with total confidence.
- Short circuit protection
- Over-voltage protection
- Over/under-temperature protection
- Over-current protection
- Loop back protection
- Over-charging / discharging protection
- UN38.3 Air Transport Safe

Essential Charge and SYNC Cables

Tangle-free Charge and sync cables

GP's Chrage & Sync Cables is perfect for day-to-day use. Crafted from flexible materials, it can be stretched and bent over 10,000 times without breaking.

Supporting Quick Charge and with a maximum 18W output, it's compatible with a variety of applications. This cable supports 480Mbps high-speed transfer of all file types, so data can be transferred in a flash.

XPLOR Head Torches

The world is yours to **XPLOR**

Great explorers are never deterred by the dark. Gear up in style with GP XPLOR headlamps for your wildest quests in the dark.

XPLOR the Epic

PHR19

Adventure Headlamps (Outdoor activities)

Your outdoor adventures have never looked so bright with PHR19 with a formidable 1200 lumens, this portable yet extremely sturdy powerhouse features dual light sources to provide optimal brilliance in the wildest environment. With the water and drop resistance this headlamp is as tough as you.

1200 Lumens 4 brightness levels per light sources

SOS & beacon Modes

IPX8 water resistance & aluminium alloy housing

100h Long runtime up to 100hrs

PHR17

Compact headlamp (trail running)

Waterproof and shock resistant, the PHR17 has been designed to withstand the toughest of trails. With 500 lumens of brightness, long runtime (up to 100 hours) and different light modes, it is the perfect outdoor companion for your next trail running, hiking or camping adventure.

4 Brightness Levels with spot and flood light

Long runtime up to 45hrs

Red LED for Night Vision

SOS & beacon Modes

IPX8 Water Resistance

140 min Recharge via USB-C port

PHR16

Ultra compact headlamps (urban running)

Whether you're beating your personal best or going for a morning jog. You'll barely feel a thing with PHR16's ultra compact size and ultra light weight (44g). With 300 lumens of brightness, there's never a bad time for a run.

4 Brightness Levels

Red LED for Night Vision

IPX8 Water Resistance

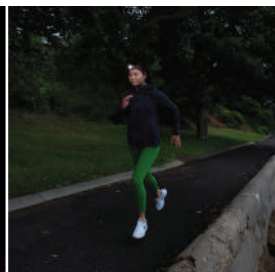

Long runtime up to 45hrs

SOS & beacon Modes

100 min Recharge via USB-C port

Discovery Everyday Torches

CK12/CP21/C31X

Lightweight

These mini aluminium flashlights are so easy to carry you won't even notice.

Portable

Each flashlight is designed to be pocket-sized – CK12 allows you to carry it as a keychain; CP21 has a pocket clip to attach to your outfit; C31X has a lanyard enabling easy access.

One-hand Operation

Switch easily with a single touch of the button. You can even adjust the brightness levels on C31X.

C32/CR41/CR42

Focusing System

One-handed adjustable focus lets you zoom out to floodlight to a large area or zoom in to a spotlight for long-range observations.

SOS Signal

Ideal in emergencies to alert your presence to those around you.

Single Button Operation

Turn the flashlight on/off or cycle through different brightness levels and SOS mode with a single touch of the button.

Discovery Everyday Head Torches

CH31

Versatile Light

Weighing just 25g, this mini headlamp has a pocket clip allowing you to attach it to a backpack, sports belt or even running shoes.

Child-friendly

Providing soft lighting and a comfort-stretch headstrap for a secure fit, this headlamp is an excellent companion for kids while reading or playing.

Single Button Operation

Turn the flashlight on/off or cycle through different brightness levels and flashing mode with a single touch of the button.

CH42/CH43/CH44

Lightweight

This compact headlamp is so easy to carry you won't even notice.

Dual Light Sources

You can switch easily between spot and flood lights to illuminate near and long distance to suit for any scenario.

Single Button Operation

Turn the flashlight on/off or cycle through different brightness levels and flashing mode with a single touch of the button.

Brightness Motion Sensor

Simply waving your hand in front of the headlamp will automatically adjust the brightness – ideal for when your hands are dirty or occupied. (only for CH44)

Rechargeable Batteries Compatibility

Compatible with both rechargeable (NiMH) and single-use batteries. The headlamp also provides over discharge protection and increase sustainability. (only for CH43/CH44)

Discovery Work Torches

C33

Focusable Light

Illuminate your surroundings while preserving your night vision with red light mode. Comes in handy for map reading at night.

Dual Light Sources

You can switch easily between front and COB to illuminate near and long distance to suit any scenario.

C34

Dual Light Sources

You can switch easily between front and COB to illuminate near and long distance to suit any scenario.

Discovery Work Head Torches

CHW53/54

Durable

With 5m shock proof and IPX5 water resistance, this headlamp is built to get the job done.

Rechargeable Batteries Compatibility

Compatible with both rechargeable (NiMH) and single-use batteries. The headlamp provides over discharge protection and enhanced sustainability.

Red LED for Night Vision

Illuminate your surroundings while preserving your night vision with red light mode. Comes in handy for map reading at night.

Brightness Motion Sensor

Simply waving your hand in front of the headlamp will automatically adjust the brightness – ideal for when your hands are dirty or occupied. (CHW54 Only)

CHR35

Versatile Combo

Use as a headlamp with the headstrap or detach from the strap to operate as a hand-held flashlight.

Hands-free Usage

A convenient pocket clip and magnetic tail cap enable the light to securely attach to a pocket, bag or metal surface for hands-free operation.

USB Rechargeable

Bundled with a 18650 Li-ion battery and easily rechargeable via Micro-USB with LED indicator to show charging status.

Enhanced Sustainability

As people's lives progress and place greater demands on our planet, GP has the responsibility to develop more sustainable sources of power.

Beyond the products themselves, GP is actively exploring ways to increase the use of recycled materials in our packaging. Our DISCOVERY range features plastic-free packaging using paper and models that are compatible with rechargeable batteries.*

Planet Friendly Packaging

The entire DISCOVERY range uses plastic-free paper packaging.

Rechargeable Battery Compatibility*

Compatible with both single-use batteries and rechargeable (NiMH) batteries, our headlamps have similar performance with the flexible power options.

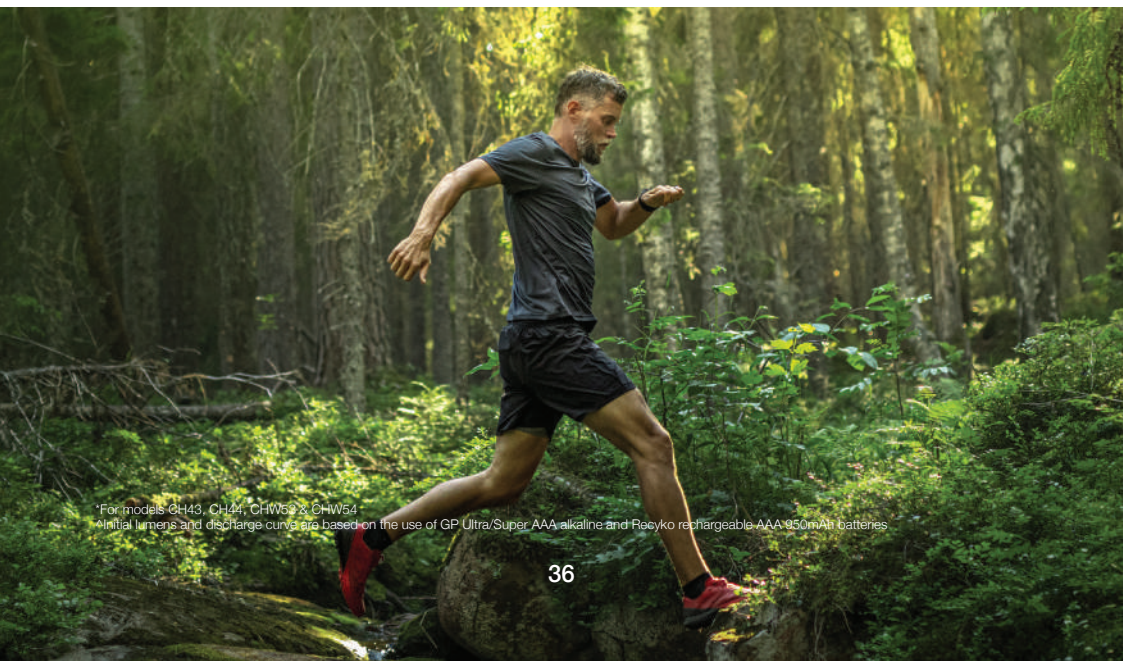

Over Discharge Protection*

Our headlamps are designed to prevent rechargeable (NiMH) batteries from over discharging, hence protecting the batteries full life-cycle.

Reduce Environmental Impact*

Power up your headlamp with rechargeable (NiMH) batteries that come with hundreds of recharging cycles to help reduce battery waste from single-use battery usage.

*For models CH43, CH44, CHW52 & CHW54

Initial lumens and discharge curve are based on the use of GP Ultra/Super AAA alkaline and Recyko rechargeable AAA 950mAh batteries

A New Way to Look at Portable Power

How to grow in a market that is 'flat'?

The battery and portable power category is evolving. To unlock growth, we need to think beyond the traditional battery shelf — and reimagine the entire in-store experience.

GP's category vision is built on four pillars:

Expand the Category Move from selling batteries to owning the broader 'device charging' space — capturing new consumer needs across power banks, wireless charging, and beyond.

Give Every Category the Right Space Allocate shelf space that reflects the true importance and growth potential of each segment, ensuring high-demand products are always visible and accessible.

Break Down Rechargeables Barriers Remove friction and confusion at the shelf with clear, simple communication that makes it easy for shoppers to choose the right rechargeable solution.

Help Consumers Navigate with Confidence Guide shoppers to the right battery solution — by cell type and by performance level — so every purchase decision feels simple and certain.

The Result: A Portable Power Center

A dedicated, clearly structured in-store destination that separates Power Up My Device from Batteries — making the category easier to shop, easier to grow, and impossible to miss.

POSM Solutions

Secure Prominent Secondary Display for Batteries

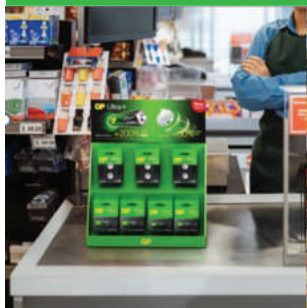

Compelling displays evoke emotions in shoppers. Selecting the right location at the right moment enhances brand awareness, product visibility, and the sale of batteries

The Right Display. The Right Place. The Right Time. Every touchpoint in the store is an opportunity to connect with shoppers and drive conversion. Secondary displays are proven to increase purchase intent, reinforce brand recognition, and grow category sales — wherever they are placed.
